Storage cabinets

column

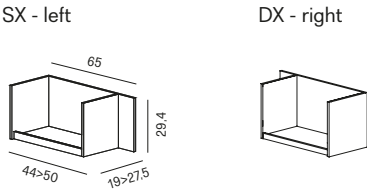

Giralot Mini is a versatile system of storage elements that swivel 180° on the column, fixed to the wall in two points, and resting on the floor. The depth is 30 cm. The fixed upper part translates into a handy “valet shelf” and creates an unusual contrast between the fixed top and the underneath rotating containers. The finishes of the elements can be in **V** Veneer (wood) or **T** Touch (lacquer). Giralot is versatile and multi-purpose, it can conceal or highlight the items stored (see page 48-49). Each shelf can bear weight up to 10 kg. The chosen composition will be delivered already assembled. Maximum baseboard height for standard foot is 7,5 cm. **For baseboards high up to 17,5 cm, available a special foot visible part of which is increased by 10 cm (overall height 148 cm) without any variation on the elements.**
